REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The following is a statement of reasons for the indication of allowable subject matter: The instant application discloses an RFI extraction mechanism for passing a UWB signal while suppressing a narrowband interference signal that overlaps the UWB signal in frequency. Prior art references (Scarpa US Patent 5,325,204 and Richards et al. US Patent 6,529,568) show similar methods but fail to teach: **"wherein first and second widths of the first and second impulsive shapes, respectively, are less than a reference width of a half cycle of a highest frequency of the UWB signal"**, as in claims 1 and 29 and 59; **"a receiving transmission line having a third impedance configured to receive respective portions of said incoming signal from said first transmission line and a reflected portion of said incoming signal from said stub"**, as in claims 57, 66; **"inverting and time-shifting a first impulse component and second impulse response component and adjusting the relative position of the first impulse component and second impulse component"**, as in claims 58 and 71; **"a bi-phase wavelet demodulator"**, as in claims 63, 70; **"determining an amplifier bias of an amplifier in said radio front end to achieve said relative position; accessing a memory table containing a target value for said amplifier bias corresponding to the predetermined frequency; and sending the target value to the amplifier"**, as in claim 64.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance.
